Summary

Java full-stack developer with professional Spring Boot experience at Wipro, building and maintaining RESTful services for the OSDU platform. Builds applications end to end — a layered Spring Boot and React property booking platform, plus live React products running in production on Vercel across 100+ deployments with uptime and error monitoring. Comfortable owning a feature from data model through REST API and UI to deployment, backed by hands-on AWS, Docker, and CI/CD experience.

Skills

Languages: Java, JavaScript, Python, SQL, HTML, CSS

Backend: Spring Boot, Spring Data JPA, Hibernate, REST APIs, DTO Patterns, Maven

Frontend: React, React + Vite

Databases: MySQL, PostgreSQL, DynamoDB

Cloud: AWS — EC2, S3, IAM, DynamoDB, CloudWatch, RDS, ECS

DevOps: Docker, Jenkins, GitHub Actions, CI/CD

Experience

Project Engineer

February 2022 – March 2023

Wipro Technologies, Bengaluru

Tech: Core Java 8+, Spring Boot, Microservices, PostgreSQL

- Developed and integrated **Java-based solutions for the OSDU platform** — an open data standard for the oil and gas industry — building applications in Core Java (Java 8+) with Spring Boot.
- Built and deployed **RESTful services within a microservices architecture**, designing for modularity and keeping code maintainable as requirements shifted across releases.
- Managed PostgreSQL databases and **resolved critical production issues through real-time troubleshooting**, restoring stability without introducing regressions.

AWS Solution Architect & DevOps Intern

February 2024 – July 2024

Micro Degree, Bengaluru

Tech: AWS, Jenkins, Docker

- Designed AWS environments across EC2, S3, and IAM, choosing configurations for scalability and cost rather than accepting defaults.
- Built **CI/CD pipelines with Jenkins and Docker** to cut manual deployment steps, monitoring resource utilisation through CloudWatch to keep environments stable.

Independent Full-Stack Developer

July 2024 – Present

Self-Directed Projects

Tech: Java, Spring Boot, React, AWS

- Design, ship, and operate full-stack applications end to end — data model, REST API, React frontend, and production deployment.

Projects

ViBerent — Property Booking Platform | Java, Spring Boot, Spring Data JPA, MySQL, React, Vite

📁 github.com/m-manu619/viberent-booking-platform

- Layered Spring Boot backend — **10 REST controllers over 11 services, 5 JPA repositories, and a dedicated DTO layer**, wired with constructor injection to keep the API contract separate from persistence entities.
- Custom **date-range query prevents double-booking** by rejecting reservations that overlap an existing pending or confirmed stay; ownership checks return 403 on cross-user access.
- Guest and admin flows covering property search, booking, cancellation, review CRUD, and payment confirmation; React + Vite frontend with a centralised Axios service layer and route guards.

Pro Cricket Auction Manager | React, Vite, WebSockets, Cloudflare Workers

Live

▲ pro-cricket-auction-manager-client.vercel.app

- Live T20 auction platform supporting **solo play against 9 AI franchises or real-time rooms for up to 10 players**, with host controls, seat assignment, and shareable invites.
- Real-time bidding with WebSocket-synchronised state across connected clients, a Cloudflare Workers player-pool service, and authenticated user accounts with error monitoring across **100+ production deployments**.
- Ships a 25-pick snake draft feeding a full T20 season with fixtures, playoffs, and standings over a 450+ player pool.

▲ ipl-2027-retention-simulator.vercel.app

- Squad-planning tool enforcing real retention constraints — **18-25 squad size, max 8 overseas, minimum 17 Indian players, Rs 130 Cr cap** — with live violation detection and committed-versus-free purse tracking across all 10 franchises.

AI Resume Screening & Job Matching Tool | Python, FastAPI, React, NLP

🔗 github.com/m-manu619/ai-resume-screening-job-matching-tool

- Batch-screens PDF and DOCX resumes against **14 engineering role profiles** or a custom job description, with multiple text-extraction fallbacks including OCR.
- Six-component weighted scoring gives explainable breakdowns of matched and missing skills, behind API-key-protected endpoints with a test suite and a **20x20 labelled accuracy benchmark**.

Cloud File Management System | Java, Spring Boot, AWS S3, Docker

🔗 github.com/m-manu619/Cloud_File_Management_System

- Spring Boot REST service for file upload and download backed by Amazon S3 through the AWS SDK, with UUID object keys and content-type resolution on retrieval; containerised with Docker.

Certifications

- **AWS Certification — MicroDegree (Apr 2024)**: Cloud architecture across EC2, S3, IAM, DynamoDB, and CloudWatch, applied during the accompanying internship.
- **DevOps Certification — MicroDegree (Jun 2024)**: Delivery automation and CI/CD pipeline construction with Jenkins and Docker.
- **Machine Learning Using Python — InvenTeron Technologies**: Supervised and unsupervised learning workflows in Python, applied later in the NLP resume-screening project.
- **Goldman Sachs — Excel Skills for Business (Forage)**: Job simulation covering spreadsheet modelling and analysis for business decision-making.
- **PwC Switzerland — Power BI (Forage)**: Job simulation building client dashboards and translating business questions into data visualisations.
- **Verizon — Cloud Platform (Forage)**: Job simulation covering cloud platform fundamentals and migration considerations.

Education

B.E., Computer Science

Malnad College of Engineering, Hassan

Graduated: 2021

CGPA: 7.8 / 10
